

# CA Kiosk for RMS

A low cost solution for digital signage and price checking

CA Kiosk for RMS is used by any retail store using the Microsoft RMS, Retail Management System. It is fully integrated with the RMS data base; all of your retail items are already set up.

## Digital Signage

- Big 10 inch display in HD
- Promote store events and special sales
- Highlight your sale items using RMS pricing
- Create your own graphical signage
- Create signage direct from RMS, by selecting the items (same as price checker display)
- Customize signage based on location in store

## Price Checker

- Customers can verify pricing on their own
- Sale prices displayed with effective dates
- On screen customer instructions
- Customers can scan the UPC bar code or key it
- Includes a picture, pricing, description and information about the item
- Options available to display your custom fields

## What is it?

CA Kiosk for RMS is a brand name computer tablet in a special tamper-proof display case. The tablet has been specially modified and protected. In addition, there is software on the RMS data base computer that bridges the communication between RMS and each CA Kiosk for RMS tablet. Internet access is NOT required.

## How to Use?

Put into your high traffic areas to gain a shopper's attention with attractive digital signage.

**Suggested Retail Price: \$1,495**

Wall mount version; floor (freestanding), desk and counter mounts available
